GIVERNY, INC. UNVEILS NEW MINI ME GEOLOGY ROCK AND MINERAL KITS FOR HOME AND SCHOOL

Mt. Pleasant, SC – Giverny, Inc. has launched a new line of Mini Me Geology rock and mineral kits for home, classroom, and home school education. The latest line, My Rockin' Collection Junior, is design to provide the educational value of their deluxe kits at a lower price point. Each kit is packaged in a tube for easy and safe storage. The kits contain 10 rock or mineral samples and an identification sheet. The company also offers free flow charts on their website for educators looking for a new approach to sample identification. This unique new line includes a Mineral Kit, Igneous Rock Kit, Metamorphic Rock Kit, and Sedimentary Rock Kit. The Junior rock and mineral kits retail for \$18.99 and are available at the company website, www.MiniMeGeology.com.

About Giverny, Inc.

Giverny, Inc's owner, Tracy Barnhart, has been a geologist for more than 17 years. The Mini Me Geology brand, inspired by her two children and their friends, provides a unique blend of high-quality products with free educational information, uniquely combining rocks and minerals from around the world and other geology related accessories with free educational information, free puzzles, and free access to the site's personal geologist. Mini Me Geology is the new destination for kids and parents looking for quality science toys, education and fun, and easy-to-understand information.

Giverny offers a deluxe line of kits called "My Rockin' Collections" rock and mineral kits, rock kit storage bags, Rock Detectives kits for elementary-aged children, "School Edition" rock and mineral kits for classrooms, individual rock and mineral samples, and identification accessories in addition to the new Junior kits. For more information, visit www.MiniMeGeology.com.
