## EARTH'S LAYERS CROSSWORD

### Across

2. The Earth's field that is controlled by electric current in the outer core.
3. Transition zone at the base of the crust.
4. The low velocity zone between the lithosphere and asthenosphere where seismic waves are absorbed strongly.
8. Top layer of the Earth that consists of the crust and the upper layer of the mantle.
9. The sand, silt and clay that make up the surface layer of the crust.
10. The state of the inner core.
11. Liquid metal layer of the Earth.

### Down

1. The soft, fluid part of the mantle that allows the crustal plates to move.
3. Layer of the Earth that is 1800 miles thick and over 1000 degrees Celsius.
5. The material that makes up the inner core.
6. A metal in the outer core with iron.
7. One of the common upper mantle rocks.
